All capitalised terms have the meaning ascribed to them in the Fund's Programme Prospectus dated 9 February 2017. "Reporting Period" refer to the period commencing on 28 June 2017 and ending on 30 June 2017. "Reporting Date" means 30 June 2017.

### Investment Objectives

NIDF aims to provide investors regular and stable income by making primarily debt investments in infrastructure projects located in Nigeria. It seeks to build a diversified portfolio of investments in projects that (i) provide essential economic and social services; (ii) have long-term predictable cash flows; and (iii) have asset base with long useful life.

NIDF focuses on making investments that offer high degree of certainty about the future cash flows to be received by the Fund, while seeking to preserve the capital value of its investment assets over the long term. The Fund's investment portfolio of infrastructure loans and other securities targets a gross return of 3.00% to 4.50% over and above the comparable federal government bond yields prevailing from time-to-time in Nigeria.

The income generated by the Fund, in the form of coupon and fees received from the borrowers, is distributed periodically to the Unitholders, after deducting the operating expenses of the Fund.

## Investment Policy

NIDF invests in senior and subordinated debt of private or public sector led infrastructure projects in the following sectors and businesses:

- Generation of electricity, including from renewable sources, and its transmission and distribution
- Transportation & logistics, including ports, airports, highways, railway transportation, mass transit systems, industrial zones and warehouses
- Infrastructure for provision of telecommunication services including mobile telecom towers, fibre optic networks and data centres
- Storage and transportation facilities for hydrocarbons, including natural gas
- Water treatment, transmission and distribution for domestic, commercial or industrial use, wastewater treatment and water recycling
- Provision of utilities as well as municipal and industrial waste management
- Social infrastructure such as hospitals, schools, training facilities, accommodation and similar facilities, developed primarily on PPP basis

The Fund may also invest, directly or indirectly, in the working capital loans, subordinated debt, preferred shares or warrants of such borrowers and related assets. At least 80% of Fund's assets will be invested in senior debt, securitised debt or loans to government agencies. Not more than 20% could be invested in working capital loans, subordinated debt, preferred shares or warrants.

## Summary of operations

NIDF commenced formal operations on 28 June 2017, with the completion of the Initial Offer and approval of the allotment of Units of the Fund by the SEC. In the Initial Offer, 49,450,000 Units have been allotted.

During the Reporting Period, the Fund committed to invest in two infrastructure loans aggregating 4.00 billion Naira. These loans have since been disbursed. The Fund Manager also commenced final due diligence on the third infrastructure loan, which is targeted to be committed to and disbursed within the next four weeks. On commitment of the third infrastructure loan, the entire net proceeds from the Initial Offer would have been invested in infrastructure loans.

## Net Asset Value

As on the Reporting Date, the Net Asset Value of the Fund was 5.006 billion Naira. The Net Asset Value per Unit of the Fund was ₦101.226, as on the Reporting Date.

Compared to the par value of ₦100 and the Offer Price of ₦101.20, the reported Net Asset Value per Unit reflects:

- the deduction of expenses incurred by the Fund on the Initial Offer at 1.20% of the Initial Offer Size;
- accrued interest on cash balances since commencement of operations;
- accrued expenses relation to management and operation of the Fund; and
- the up-front fee income on the infrastructure loans committed to by the Fund.

## Listing and trading of NIDF

The Units of the Fund are scheduled to be listed on the FMDQ during the week of 17 July 2017. Existing Unitholders will be able to trade their Units after the listing.

## Distribution

Since the commencement of formal operations by the Fund happened only a few days prior to end of the Reporting Period, the Fund Manager has not proposed any Distribution for the Reporting Period.

A CHAPEL HILL DENHAM FUND

However, it is intention of the Fund Manager to consider and, if approved, announce an interim Distribution to the Unitholders for the period ending 31 July 2017. The details of the interim Distribution, if any, will be communicated to the Unitholders and to the FMDQ.

## Investment goals vs. Actual performance

The following table shows the performance of NIDF against some of the key investment goals:

Goal	Performance	Remark
Expeditious deployment of capital raised	Ahead of target	80% capital from Initial Offer deployed with one week
Target gross spread of 300-450bps over FGN	Achieved	All initial loans will meet/exceed the target yield
Senior loans to be at least 80% of the portfolio	Achieved	All initial loans are senior loans
Portfolio to include primarily floating rate loans	Achieved	All initial loans are floating rate*
Invest primarily in long-dated loans	Achieved	The tenor of initial loans is between 7 and 10 years
Make quarterly distribution to Unitholders	On target	First Distribution expected to be announced with one month of operations

\* For certain loans, the interest rate is fixed for the first year.

## Portfolio information

During the Reporting Period, the Fund committed to the following infrastructure loans:

Borrower	Description	Main terms
Cummins Power Generation (Nigeria) Limited	Portfolio of seven captive power plant	Amount: ₦2.50 billion Tenor: 9 years Coupon: 10-year FGN + 4.00%
Power & Energy Africa Limited	Portfolio of three captive power plants	Amount: ₦1.50 billion Tenor: 8 years Coupon: 10-year FGN + 4.00%

## Future project pipeline

The Fund Manager is actively engaged in sourcing and structuring new infrastructure loans for the Fund. Currently, it has signed term sheets for an additional loan amount of 16.3 billion Naira, as well as various stages of discussions and negotiations on loans aggregating 36 billion Naira.

Given the substantial investment needs for different infrastructure sectors in Nigeria, the longer-term potential and demand for long-dated, Naira-denominated financing is quite large. The Fund Manager is tracking a pipeline of projects with potential investment size of in excess of 400 billion Naira, which are expected to materialise during the next 12-24 months.
